SUMMARY

Software Engineer building event-driven systems, REST APIs, and real-time infrastructure in Python/FastAPI with Redis Pub/Sub, Elasticsearch, and Docker. Production experience across Auth0-based authentication, RBAC, observability with Grafana, and CI/CD-driven deployments supporting **150+ Android and iOS devices**.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL
Frontend	React.js, Next.js
Backend	FastAPI, REST APIs, WebSockets, Microservices, Kong Gateway
Data	PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch
Infrastructure & DevOps	Docker, Nginx, HTTPS, CI/CD, Git, GitLab, Linux, Bash, Fluent Bit, Grafana
Testing & Security	Pytest, Authentication (Auth0), RBAC (Role-Based Access Control)

EXPERIENCE

FlintLab Inc. (Jul 2025 - Present)

Early-stage startup building infrastructure for Android and iOS device testing and automation

Software Development Engineer & Founding Engineer (one of the first engineers hired)

- Architected and shipped production **Python/FastAPI microservices** using **Redis Pub/Sub** for event-driven communication, powering allocation, automation, logging, and session workflows across **150+ Android and iOS devices**.
- **Designed and led the iOS platform implementation**, owning device streaming, interaction, recording, and IPA resigning to support remote automation for a fleet of **50+ iOS devices**.
- Built a **log-embedding pipeline** for an internal AI-powered root cause analysis (RCA) system, using **vector-database retrieval** to analyze distributed microservice logs and surface relevant failure patterns.
- Engineered an **Android observability pipeline** (ADB Logcat, Redis Pub/Sub, Fluent Bit, Elasticsearch, Grafana dashboards) with retention controls, reducing representative log volume by **80% (98K → 20K lines)**.
- Implemented **authentication via Auth0 and RBAC**, and deployed services to production using **Docker, Nginx, HTTPS, and CI/CD** on **Linux** infrastructure.

FlintLab Inc. (Mar 2025 - Jun 2025)

Software Development Engineer Intern

- Reduced redundant frontend API calls by **30%** using state management and Redis caching; contributed to an SPA migration reducing observed routing time from **300 ms to 20 ms**.
- Migrated **Next.js data fetching from client-side to server-side execution**, improving data-access control and reducing backend interaction exposure in the browser.

PROJECT

MyGVP Browser Extension & CLI *(Node.js, MongoDB, npm)* GitHub

- Designed and built a **Node.js browser extension and CLI tool** used by **500+ students** to access academic results.
- Processed **1,000+ academic result queries** and distributed versioned releases through the **npm ecosystem**.

EDUCATION

Gayatri Vidya Parishad College of Engineering (GVPCE), Visakhapatnam 2021 - 2025

Bachelor of Technology in Computer Science and Technology CGPA: 8/10
