SUMMARY

Full-Stack Software Engineer with startup experience building production web, backend, and real-time systems using Next.js, React, Python, FastAPI, Redis, and Docker. Experienced in end-to-end development across frontend, backend, APIs, device infrastructure, observability, and production deployments, with hands-on ownership of systems supporting **150+ Android and iOS devices**.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL
Frontend	React.js, Next.js
Backend	FastAPI, REST APIs, WebSockets, Microservices, Kong Gateway
Data	PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch
Infrastructure	Docker, Nginx, Git, GitLab, Fluent Bit, Appium

EXPERIENCE

FlintLab Inc. (Jul 2025 - Present)

Early-stage startup building an AI-powered device infrastructure PaaS unifying real and virtual device execution

Software Development Engineer & Founding Engineer (one of the first engineers hired)

- Built production **Python/FastAPI services** with Redis Pub/Sub for event-driven communication, supporting **150+ Android and iOS devices** across allocation, automation, logging, and session workflows.
- **Designed and led the iOS platform implementation**, owning streaming, device interaction, recording, and IPA resigning infrastructure from scratch for **50+ iOS devices**.
- **Built the log-embedding pipeline** for an internal AI-powered RCA system, using vector-database retrieval to analyze distributed microservice logs and surface relevant failure patterns.
- Built an Android observability pipeline using **ADB Logcat, Redis Pub/Sub, Fluent Bit, and Elasticsearch**, reducing representative log volume by **80% (98K → 20K lines)** with retention controls.

FlintLab Inc. (Mar 2025 - Jun 2025)

Software Development Engineer Intern

- Reduced redundant frontend API calls by **30%** using state management and Redis caching; contributed to an SPA migration reducing observed routing time from **300 ms to 20 ms**.
- Migrated **Next.js data fetching from client-side to server-side execution**, improving data-access control and reducing backend interaction exposure in the browser.

PROJECTS

MyGVP Browser Extension & CLI(Node.js, MongoDB, npm) [GitHub](#)

- Designed and built a **Node.js browser extension and CLI** used by **500+ students** to access academic results.
- Processed **1,000+ academic result queries** and distributed versioned releases through the **npm ecosystem**.

EDUCATION

Gayatri Vidya Parishad College of Engineering (GVPCE), Visakhapatnam 2021 - 2025

Bachelor of Technology in Computer Science and Technology CGPA: 8/10
